

**FALCON FIRE PROTECTION DISTRICT
FACT SHEET
ELIMINATION OF DIRECTOR TERM LIMITS
MAY 2, 2023 ELECTION**

- Elimination of term limits does not remove the statutory requirement that the District hold bi-annual elections for Board members (held in May of odd-numbered years).
- In some past elections, the Fire District has not had enough candidates running to fill open positions on the Board.
- Fire Protection Districts involve a specialized area of expertise for management and operations. Institutional knowledge of Fire District's history, operations and management are valuable assets to have on the Board and eliminating Director term limits would allow for more continuity of governance.
- The Fire District has a limited number of eligible electors available to commit to the obligations of a being a Board member and with some level of knowledge or experience in local government management and finances, fire protection services, and/or the history of the Fire District.
